

Divider

Divider A simple and effective visual separator for organizing content sections. Features multiple styling variants, horizontal and vertical orientations, and customizable colors for clear content separation.

How to use ■ `import { AavaDividersComponent } from "@aava/play-core"` ; Basic Usage ■ Simple divider implementations for content separation. Variants ■ Different divider styles for various visual contexts. Variant Types ■ Solid : Clean, continuous line (default) Dashed : Dashed line pattern Dotted : Dotted line pattern Gradient : Smooth gradient effect Orientation ■ Horizontal and vertical divider orientations for different layout needs. API Reference ■ Inputs ■

Property	Type	Default	Description
variant	'solid' 'dashed' 'dotted' 'gradient'	'solid'	Visual style of the divider
orientation	'horizontal' 'vertical'	'horizontal'	Direction of the divider
color	string	'#000000'	Color of the divider (hex, rgb, or CSS color name)

CSS Custom Properties ■

Property	Default	Description
--divider-color	Component color input	Dynamic color applied to borders
--divider-background-gradient	Theme-based Gradient	Background for gradient variant

Best Practices ■ Design Guidelines ■ Use dividers sparingly to avoid visual clutter Choose appropriate variants based on content hierarchy Ensure sufficient color contrast for accessibility Consider spacing around dividers for optimal visual separation Layout Usage ■ Use horizontal dividers between content sections Use vertical dividers in sidebar layouts or columns Apply consistent divider styles throughout the interface Match divider colors to your design system Accessibility & Dev Guidelines ■ The Divider component is purely visual and should not convey crucial content structure on its own. However, it's accessible: Uses `role="separator"` Honors `aria-orientation="horizontal | vertical"` When used with text, ensure surrounding context is semantic Test selector: `data-testid="play-divider"` Do's and Don'ts ■ Do Don't Use for layout separation in dense UIs Don't use as a replacement for headings Style via tokens for consistent spacing Don't hardcode padding/margins Add labels only when useful context exists Don't overuse labeled dividers visually Use vertical divider inside horizontal layout Don't nest labeled dividers unnecessarily Use inset variant to separate nested blocks Don't rely solely on divider for structure

```
<aava-dividers
  variant="solid"
  orientation="horizontal"
  color="#BBBEC5"
></aava-dividers>
```

```
<aava-dividers
  variant="solid"
  orientation="horizontal "
  color="#BBBEC5 "
></aava-dividers>
```

```
<aava-dividers
  variant="dashed"
  orientation="horizontal "
  color="#BBBEC5 "
></aava-dividers>
```

```
<aava-dividers
  variant="dotted"
  orientation="horizontal "
  color="#BBBEC5 "
></aava-dividers>
```

```
<aava-dividers variant="gradient" orientation="horizontal"></aava-dividers>
```
