

# Component Documentation

The Timeline component is a powerful and flexible way to display chronological events, project milestones, or any sequential information. It provides multiple orientations, status indicators, and extensive customization options while maintaining accessibility and responsive design.

The component supports both vertical and horizontal layouts, various text alignment patterns, multiple sizes, and status-based visual indicators. It's perfect for project management, user onboarding flows, historical displays, and any scenario requiring chronological representation.

## How to use

### Basic Timeline

A simple vertical timeline with default settings.

```

<aava-timeline
  [events]="basicEvents"
  [size]=" 'large' "
  [orientation]=" 'vertical' "
  [textAlign]=" 'zigzag-left' "
  [iconCircleSize]=" '40px' "
  [iconCircleBgColor]=" '#fff' "
  [iconCircleBorderColor]=" '#ccc' "
></aava-timeline>

```

---

```

basicEvents: TimelineEvent[] = [
  {
    time: '10:00 AM',
    title: 'Project Kickoff Meeting',
    description: 'Initial project planning and team alignment session',
    iconName: 'circle-check',
    iconColor: '#E91E63',
    iconSize: '24px',
    year: '2025',
    status: 'completed',
  },
  {
    time: '2:00 PM',
    title: 'Development Phase Started',
    description: 'Begin coding and implementation of core features',
    iconName: 'loader',
    iconColor: '#E91E63',
    iconSize: '20px',
    year: '2025',
    status: 'current',
  },
  {
    time: '4:30 PM',
    title: 'First Milestone Completed',
    description: 'Successfully completed the initial development phase',
    iconName: 'check-circle',
    iconColor: '#E91E63',
    iconSize: '16px',
    year: '2025',
    status: 'pending',
  },
],
];

selectedEvent: TimelineEvent | null = null;

onEventSelect(event: TimelineEvent): void {
  console.log('Timeline event selected:', event);
  this.selectedEvent = event;

## TimelineEvent Interface

### Features

#### Multiple Orientations

- Vertical : Traditional top-to-bottom timeline layout
- Horizontal : Left-to-right layout for wide screens

#### Text Alignment Patterns

- zig-zag : Alternating left/right alignment for vertical, up/down for horizontal
- zigzag-left : All text aligned to the left
- zigzag-right : All text aligned to the right
- zigzag-up : All text aligned upward (horizontal only)
- zigzag-down : All text aligned downward (horizontal only)

#### Status System

- completed : Finished events with success styling
- current : Currently active events with highlight styling
- pending : Upcoming events with neutral styling
- unreached : Future events with disabled styling

#### Size Variants

- x-small : Compact size for dense interfaces
- small : Small size for limited space
- medium : Standard size for most use cases
- large : Large size for prominent displays

#### Customization Options

- Custom icon and image support
- Flexible color theming
- Custom sorting functions
- Content projection for advanced layouts
- Responsive design with automatic spacing

### Best Practices

## **Content Organization**

- Use clear, descriptive titles for each event
- Keep descriptions concise but informative
- Use consistent date/time formats
- Group related events logically

## **Visual Hierarchy**

- Choose appropriate sizes based on content importance
- Use status indicators consistently across events
- Maintain visual balance with text alignment patterns
- Consider screen size when choosing orientation

## **Accessibility**

- Provide meaningful alt text for images
- Use semantic status indicators
- Ensure sufficient color contrast
- Support keyboard navigation

## **Performance**

- Limit the number of events for optimal performance
- Use custom sorting functions sparingly
- Consider lazy loading for large timelines
- Optimize images and icons

## **Examples**

### **Project Timeline**

### **User Journey Timeline**

## **Styling**

The timeline component uses CSS custom properties for theming and supports extensive customization through:

- Icon circle colors and sizes
- Status-based color schemes
- Responsive spacing adjustments
- Custom CSS classes for advanced styling
